TO CORRESPONDENTS.

"The Lament of Two Articled Clerks" met with a response, as well as an echo; subject must bide its time. "W. B.," Birmingham (should send us a reference to town, that we might put confidence in the statements). Article will be used soon, and cash sent when used). "X. Y. Z." (several times answered in our columns). "H. W. B." "T. W." (we cannot answer without seeing a drawing). "S. W." "J. H. S." "R. R." (the coal described is similar in principle to many others. Any delay in the delivery of THE BUILDER must rest with the parties who supply it). "O. G." "J. B." (Lambeth). "E. A." "Z." (Prestcot). "V. Y." "G. W. F." (thanks; a report was in hand). "M." "S. H." "Correspondent" (shall appear. We cannot decide as to church without seeing sketch). "Watchman" (thanks; but the notice might do harm). "H. H." (shall hear from us). "A Constant Reader." "B. J." "Mechanic" (there is little employment for modellers, unfortunately). "W. B." (Shaw's work on "Alphabets"). "T. C." (see below). "C. B." "C. M." "Alphabets"). "T. C." (see below). "C. B." "C. M." (we will inquire into the scheme). "Hints on House Property." by F. Cross, architect; "On the Climate of Manchester;" "A Plan for Removing Sewage of London," by H. Stothert, &c., &c.

TO CONSUMERS of PLASTER of PARIS. —The Advertiser is in a position to supply the above article in quantity at extreme low rates.—Particulars may be had on application.—Address, W. B. WILKINSON, Brodhow-street, Bow-common-lane, Tyne.

ATKINSON'S CEMENT.—This Cement has hitherto been manufactured in Yorkshire, and through long detention at sea, has often proved stale and unfit for use on its arrival in London. By the arrangement now made, the Cement will be manufactured in London, and thus proceeded to consumers as in a fresh and genuine state, by the sole Agents, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENTS, for internal stucco, are employed very advantageously in place of wood for skirtings, architraves, and panel mouldings, and for internal flooring, instead of stone. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an important substitute for common plastering in those cases where expedition and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over that material of wholly resisting frost. When used as a stucco it does not encrustate or turn green in damp situations, as I usually the case. Employed as an hydraulic mortar for brickwork, it carries four to five measures of sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement with but one measure of sand. This superior cementing power, combined with its eminently hydraulic properties, renders it par excellence the finest material for building sea and peninsula walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water are required.

Manufactories—J. B. WHITE and SONS, Millbank-street, Westminster, and 36, Seel-street, Liverpool.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, Son of the Patentee.—Messrs. ROBINS, ASPDIN, and Co. request reference to No. 388, page 481; and also Nos. 390 and 391, pages 521 and 537 of "The Builder," for accounts of EXPERIMENTS on the strength of Portland Cements, whereby the great superiority of their Cement is manifest. This Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the action of water; is stronger in the immediate quantities, harder, and more durable than any other description of Cement; it does not vegetate, crystalize, or burn green; nor is it affected by any atmospheric influence whatever the climate, resisting alike the action of frost and heat. It is manufactured to set in from five to sixty minutes. For all purposes that Cement is applicable the Patentees challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; also by their Agent at the Depôt, 1, Rock Grove, Liverpool.

MARTIN'S PATENT

FIRE PROOF AND ORNAMENTAL CEMENT,

APPLICABLE FOR

ALL INTERNAL PURPOSES WHERE PLASTERING IS REQUIRED.

This invaluable Cement has now been before the public many years, and obtained so high a standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. Messrs. STEVENS and SON however feel called upon to observe, that from the greater extent of surface which a given quantity of MARTIN'S will cover, as compared with other Cements for internal work, there will be found a gain of 100 per cent in material, full 75 per cent less in price, with an additional saving in labour of 10 per cent., by its allowing about forty minutes for working, being less than one-fourth of the time of other cements of a similar nature; therefore carried with greater facility, making together the aforesaid saving of full THIRTY-THREE PER CENT.; its advantages therefore cannot admit of doubt.

Specimens, showing its beauty, hardness, and applicability to all plain and ornamental purposes, may be seen; and the cements, in any quantity, obtained of Messrs. STEVENS and SON, at their Plaster and Cement Works, 196, Drury-lane, London.—Manufactory, Pervent Mill, Derby.

THE PARIAN CEMENT, for INTERNAL STUCCO, which was supplied at Messrs. J. & R. MORLEY'S warehouses and dwelling in Wood-street, Cheapside, in the year 1855, has been used throughout the premises, in every part, to the extent of several thousand yards superficial, chiefly upon recently built walls, and a small portion upon timber partitions, and that with the most perfect and satisfactory result. I feel it also necessary to observe, that the plaisterer's work was almost invariably followed up on the next day by the painters, thereby enabling me to have the buildings complete in the shortest possible time, both for business and for the occupation of the establishment. I am, therefore, of opinion, that the use of this new material is a most valuable feature in building operations, and fully justifies that which I was given to understand, viz., that it was an extraordinary material. I think it right to mention that I am at the present time having a great extent of similar work executed at another range of buildings, where time and the quality of the work are of the utmost importance.

(Signed) JNO. WALLEN, Architect, London.

To Messrs. Chas. Francis and Sons, Manufacturers, Nine Elms.
